

ORION LFP 51,2V 100Ah Battery

Lithium Iron Phosphate

The ORION LFP 51,2V 100Ah battery is a popular lithium iron phosphate battery. It is intended for use in high capacity, high voltage battery. It can power a wide range of devices including an electric buffer, solar systems, ESS, caravan systems.

Do not purchase batteries before reading and understanding these safety cautions. Using a lithium iron phosphate battery incorrectly may cause it to leak, generate heat, smoke, catch on fire, or explode.

SAFETY

- + The cell must stay in the operating temperatures outlined in its data sheet
- + The cell must not exceed voltage, current, and other ratings in its data sheet
- + Store batteries separately, and do not transport without proper packaging
- + Never store or transport together with conductive or metallic objects particularly in a pocket or bag
- + Do not keep in the sun, in a hot car, or anywhere with direct heat
- + If the cell is attached to a PCB, keep it away from high-static environments
- + Recycle discontinued batteries according to local regulations and cover terminals with insulating tape before disposal
- + Discharge end or cut-off voltage in data sheet is lower-limit for discharge cycle and should not be exceeded
- + Charger or device should implement warning for over-voltage, over current, and over-temperature, control of overcharge, and charge timer
- + Be careful not to short-circuit

TECHNICAL DATA

Battery Dimensions(W*H*D)	442x480x133mm
Battery Weight	42±0,5kg
Capacity (nominal/minimum) (0.5C Rate)	100Ah
Voltage (nominal)	51,2V
Energy Density	5120Wh
Recommended Standard Charge Method	20A, 58,4V CC-CV
Maximum Charge Method	100A, 58,4V CC-CV
Maximum Continuous Discharge	100A
Discharge Cut-off Voltage	44,8V
Operating Temperature	-20°C to 60°C
Storage Temperature	-10°C to 35°C
Communication Interface	CAN/RS485/RS232
